

PLATE ROLLING MACHINE

4 ROLL PLC PRE PINCH HYDRAULIC

HYDRO-MECHANICAL PLATE ROLLING

MECHANICAL PLATE ROLLING

DESCRIPTION

We are the most preminent Plate Rolling Machine Supplier in India, known for our sturdy machines, their robust quality, tensile strength and high attributes.

Our Mechanical Plate Rolling Machine is one of its kinds used in the process of cold working in which the sheets with high thickness can be bent into different diameter cylindrical tubes. It is widely used in boiler, chemical industry, mining, construction, shipbuilding and other machinery industry.

FEATURE

- Robust and durable
- Low maintenance
- Performance without any hindrance

SPECIFICATIONS

- All 3 rolls are driven by reduction gear motor
- Rigid construction for precise & smooth operation, and long life time usage.
- The top roll can be swiveled out for easy removal of the finished work piece.
- Foot switch for forward/reverse, fitted with a protective housing.
- Emergency stop safety cable installed around machine.
